

New Search Engine Makes Finding Documents Faster and Easier

Editorial Staff

A new search engine has been installed on ChiroWeb that promises to give more functional and precise search results to our ever growing archives.

Among the new search engine's features, users may incorporate Boolean operators (i.e., AND, OR and NOT) to narrow the search criteria. The site also contains a "More Like This" option, which lets users find groups of documents that contain similar keywords and ideas.

You can view ChiroWeb's new search engine in the archives section (www.ChiroWeb.com/search). This section also offers "Search Engine Tips" to help you find the information you need quickly.
