

ACA Offering Free Medicare Webinar

Editorial Staff

On Jan. 12, the ACA launched a free educational Webinar designed to help doctors of chiropractic improve their Medicare documentation. Developed by Susan McClelland, BS, CCA, FICC (hc) in partnership with the ACA, the twohour program can be accessed 24/7. "There seems to be a tremendous amount of confusion within the profession regarding Medicare," McClelland said. "This two-hour Webinar should provide a sound basis for clarification of these requirements and provide a good starting point for improving our documentation error rate."

To access the free Webinar, please visit the ACA's online education portal:
