

New COCSA Outreach

Editorial Staff

The Congress of Chiropractic State Associations (COCSA) Board recently voted to adopt the Scoliosis Awareness Program produced by the Scoliosis Care Foundation. COCSA will partner with the foundation in offering scoliosis educational materials to chiropractic state associations nationwide.

“[This is] a great opportunity for the chiropractic profession to partner with a nonprofit organization that is dedicated to the well-being of our children, and, together, to educate parents on the sometimes minor postural changes that could indicate a possible development of scoliosis,” commented Jeffrey Fedorko, DC, COCSA president.
