

Dr. Arlan Fuhr Inducted Into Parker's Drugless Research Hall of Fame

Parker College of Chiropractic presented Dr. Arlan W. Fuhr with the Drugless Research Hall of Fame Award during the Third Annual Parker Gala on Friday, Jan. 14, during Parker Seminars Las Vegas. Dr. Fuhr, the third inductee, plays a major role in chiropractic research as the president of [National Institute of Chiropractic Research](#) and co-founder and chief executive officer of Activator Methods International. Dr. Fuhr was honored with the award because of his dedication to chiropractic research and pursuit of excellence as a chiropractor to impact the health care of the world without drugs.

The Drugless Research Hall of Fame is an innovative recognition platform designed by Parker College to showcase significant drug-free contributions in research worldwide. Previous inductees include [Dr. Ron Rupert](#) and [Dr. Cheryl Hawk](#).

In 1985, Dr. Fuhr received the first grant ever given to chiropractic from the National Institutes of Health. Today, he impacts chiropractic research through numerous efforts including his work with the National Institute of Chiropractic Research, which raises funds for fundamental scientific, clinical, and historical chiropractic research. The NICR conducts research, and through a modest extramural grant-making program, has funded a number of research projects by other investigators.
