

Homeopathic Triple-Potency Human Growth Hormone (HgH)

Frank King, DC

Anti-aging, or at least the slowing of aging, is quickly becoming a primary focus among Americans. The average life span has nearly doubled in the last 100 years. Medical experts predict that in the next 25 to 50 years, many Americans will celebrate their 100th birthdays in extremely good health, and life spans of 120 years will not be uncommon.

A study at Bowman Gray School of Medicine in North Carolina showed the decline in human growth hormone (HgH) secretion with age can be reversed. Multiple studies throughout the U.S. show that homeopathic HgH increases both HgH and insulin-like growth factor 1 levels. *The New England Journal of Medicine* reported in 1996 that HgH treatment enhanced the functional ability of the heart and circulatory system and increased patients' quality of life.

What Is HgH?

HgH is a protein produced in the anterior pituitary gland that stimulates growth of bone and muscle. It is the most abundant hormone produced by the pituitary gland. It peaks during adolescence, the rapid phase of our growth process, and steadily declines with age. By the time we approach 65 years of age, our pituitary gland is secreting 75 percent less HgH than it did when we were teenagers.

Homeopathic HgH maximizes the positive effects of HgH through a number of advancements:

1. I recommend the unique triple-potency process that broadens the positive therapeutic potential of HgH on the body. The lower potency (10X) works at the more superficial levels of function of our bodies, such as the skin and hair. The middle potency (30X) works more in the intermediate-level functions of our body, such as our glands and organs. The higher potency (100X) works more within the deeper functions of our body, such as the mental and emotional functions.
2. Formulas with additional ingredients, including HgH, maximize the anti-aging potentials homeopathy has to offer.
3. Using a formula with a pure water base unites the pure function of homeopathic medicine with the purest base. We no longer need to rely on the traditional bases of alcohol, sugar or glycerin to stabilize our products. With the pure water base, we can best apply the benefits of a dual-delivery (oral and topical) approach. The topical dosage adds a therapeutic dimension that the oral dosage does not always accomplish. For a localized effect, spray over the face, neck, belly, etc., to help with aging or weight gain in specific areas of the body.
4. HgH can enhance the growth and development of children. Consider using with a homeopathic growth and development formula.
5. HgH can be considered as an adjunct to cancer treatment. While biochemical dosages of it

can cause increase in cancer growth, homeopathic dilutions and potencies of HgH can possibly decrease cancer growth when applying the homeopathic law of similars.

6. HgH also can help with various problems associated with overproduction of HgH. The homeopathic triple-potentization process helps bring balance to the body from either extreme. Homeopathic HgH is not a stimulant, but it brings balance to a body that is producing too much or too little HgH.

HgH can help: increase lean body mass and energy; decrease excess body fat; and improve weight loss, vision and physical strength. It can enhance sexual function, sleep quality and breathing. It has also been shown to relieve depression; mood swings; bleeding gums; phlegm build-up; coughing; anger; and apathy.

Easy to use: The new medically metered, pump-spray delivery allows easy one-handed application whenever and wherever needed. Just two or three pump sprays in the mouth and over the skin (for topical use, spray pure-water-based products only) can provide the results listed above. An "on-off" cycling of the dosage has been suggested by certain groups; I have found that biofeedback response testing provides more specific dosage information to better fit the individual needs of each patient.

Affordable: You can find Homeopathic HgH at a wide range of prices, ranging from \$12 to \$40 wholesale. It is wise to shop and compare prices, so you can provide your patients with the best products at the best value.

Broader Therapeutic Effects

Homeopathy works on the whole person at all levels of life (physical, mental and emotional). It offers the fastest delivery system on the planet. Because of its direct effect on the nervous system, results can occur as quickly as a few seconds to a few minutes after administration. More degenerative conditions may take longer (a few days to a few weeks). Individuals commonly report an increase in energy; better sleep; a sense of well-being; more youthful appearance; weight loss; and increased libido.

Homeopathy is a highly individualized healing art. Results vary depending on the individual, and whether the correct formulas are being used to address unique underlining causes to the patient's condition. If you are not receiving the desired results, consider other formulas to directly address other underlying causes.

Various biofeedback response tests help the doctor and discern which products a patient needs and does not need. These procedures also empower the doctor to know when to change doses, or stop and/or restart a product. Homeopathy is most remarkable in its actions!

The key to homeopathy's great success is finding the right formulas for each individual patient. Feel free to contact me for further information on making homeopathy easy and effective for the high-volume, broad-spectrum practice. Enjoy the journey!
